IdVector Capital

Trainee - Royalty investing in deep tech companies

Internship to support the development of a Royalty investment group specialised in Science and Technology

About IdVector

IdVector invests in revenue-generating deep tech companies by acquiring a share of their future revenues (royalty financing).

We help public and private organisations develop breakthrough technologies by providing them with the financial resources to strengthen their Research, Development and Innovation programs.

We operate through our own regulated investment fund and also syndicate larger transactions acting as a platform between long-term investors and asset owners.

Our aim is to provide useful finance resulting in better health, food, environment as well as human communications for a long-lasting impact.
