moderation platform

We've raised a new investment from Auriga Cyber Ventures and G+D Ventures to take Trust & Safety to the next level.

By Tremau

04/02/2025

We have secured **€3 million in funding** to accelerate the development of **Nima**, our **AI-powered platform to orchestrate moderation processes**, and keep advancing Trust & Safety. This investment, backed by **Auriga Cyber Ventures** and **G+D Ventures**, reflects the growing recognition of the need for effective, scalable solutions in **content moderation** and regulatory compliance.

Advancing Trust & Safety

This funding will enable us to:

- Further develop Nima's capabilities to help platforms streamline their **content moderation** processes and navigate evolving regulations;
- Expand our presence internationally, supporting a broader range of platforms in building safer digital spaces;
- Continue investing in our team and infrastructure to drive meaningful innovation in T&S.

Building on a Strong Foundation

To date, we've achieved **profitability in 2024**, built an international **team of 30+ experts**, and

worked with global platforms like **Alibaba, Bluesky, Eventbrite, Ko-Fi, and Pinterest**. Now, with this investment, we are entering the **next stage of growth**, reinforcing our position as a leader in T&S technology.

A Word from our Investors and CEO

"As TrustTech-focused investors, we have researched the Trust & Safety market landscape in search of a technology provider that can solve the harmful content challenges at scale while ensuring compliance with emerging regulations. Tremau's deep domain expertise and product vision stood out among their peers, and we are proud to partner with them," said **Assaf Shamia, Partner at G+D Ventures**.

"The current geopolitical landscape, combined with the rapid rise of AI, underscores the urgent need for a safer digital environment and more effective **content moderation** tools," said **Geoffroy Rosset, Managing Partner of Auriga Cyber Ventures**. "The founders' ambition, drive, and deep expertise have impressed us. We're convinced that Tremau is bringing much-needed technological innovation and automation to a space traditionally driven by manual approaches and legacy systems."

"Online safety should not be a privilege limited to the largest platforms. This funding allows us to continue building the infrastructure that enables all platforms to strengthen their Trust & Safety operations and stay ahead of regulatory developments," said **Louis-Victor, CEO of Tremau**

What's next for Tremau?

As online risks evolve and regulatory expectations increase, **the need for robust Trust & Safety solutions is more pressing than ever**. We remain committed to supporting platforms in meeting these challenges with technology that is both effective and responsible.

We're moving faster, working with more **online platforms** and building Nima as a **future-proof technology that stays ahead of the curve** by integrating the latest advancements in AI,

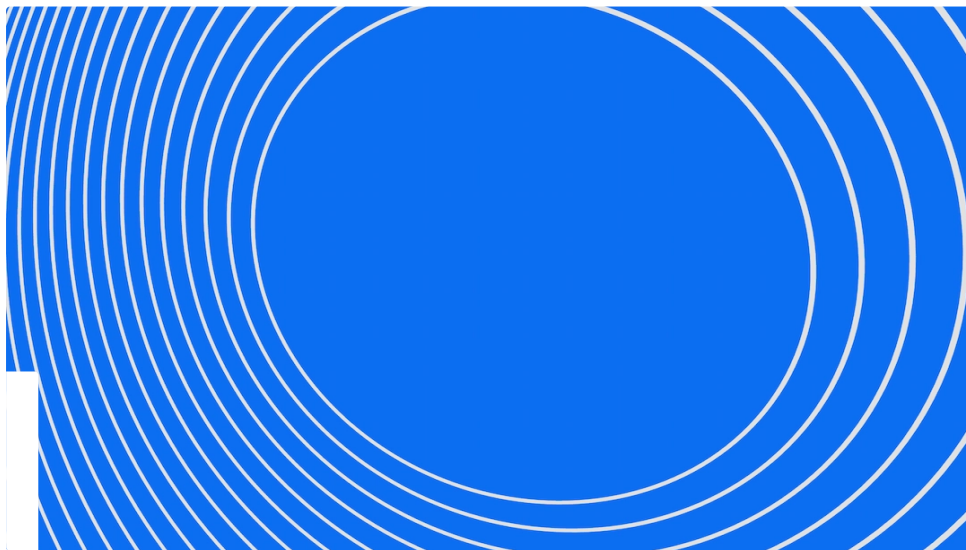

automation, and workflow optimization.

Our mission is unchanged: **become a global leader in making the internet a safer, more beneficial place for all.**
