

Tuatahi First Fibre

Tuatahi First Fibre Limited operates the second largest fibre-to-the-premises broadband network in New Zealand. The Company's network spans over 4,200km in the high growth urban areas of the central North Island of New Zealand; the Waikato, Bay of Plenty, Taranaki, Manawatu Whanganui, Hawke's Bay, Rotorua and Taupo regions of New Zealand. The majority of the network was built as part of the Government-backed Ultra-Fast Broadband initiative launched in 2010. The Company completed its initial network build in December 2019 with the network currently passing c. 267,000 premises and growing.

US Signal

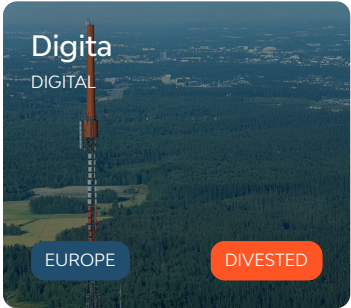

US Signal Company, LLC is a leading data center and fiber network solutions provider in the United States. The company operates ~9,500 miles of fiber network and nine data centers across multiple US Midwestern states, including Michigan, Indiana, Illinois and Wisconsin.

Network offerings span a range of connectivity products that leverage its owned network (on-net) and third party networks (off-net), creating a range of margin and growth profiles for different offerings. The network business serves ~1,100 customers with a particular focus on telecom & carriers, healthcare, and financial & professional services.

Data Center offerings include a mix of colocation and cloud (private and multi-tenant) solutions, supplemented by products including DRaaS ('Data Recovery as a Service') and BaaS (Backup as a Service). The company also provides a range of managed, professional and security services to customers requiring third-party support of their IT operations. The data center and managed IT & security business serves ~630 customers.

Digita

Digita is the owner and operator of the national broadcast network of Finland comprising 36 main stations and 152 sub and link stations. It is the only network that gives effective coverage of the whole population of Finland.

Under Igneo ownership the business invested over €40m in a network upgrade programme resulting in industry leading technology. A new management team was put in place with great focus on commercial growth and customer satisfaction and service. New service model initiated refocussing from linear broadcasting to digital services such as data centre, Internet of Things and mobile telephony offerings.

Igneo exited Digita in 2018 to a specialist digital infrastructure investment manager.
